Technical Assessment - Front-end Developer

Build the following project following its requirements and make it available on your GitHub as a public project.
You may use any technologies you prefer.
Send us the repository link as soon as you finish the assessment.

Deadline: 02/04/2020 - 23:59

Project Requirements

Name: Tasks Manager

1. Build a page that lists tasks displaying their title and status

2. The tasks must contain:
   a. Title
   b. Description
   c. Status (*Pending, In Progress, Done*)

3. Display the description of a task in a popover when hovering a task title

4. In this same page, build a form to create new tasks

5. Display the tasks according to the following requirements:
   a. *Pending* tasks must be displayed in *orange*
   b. *In Progress* tasks must be displayed in *green*
   c. *Done* tasks titles must be strikethrough

6. Create a button/link to start the task and that, when clicked, changes the status of the task to *In Progress.*

7. Create a button/link to complete the task and that, when clicked, changes the status of the task to *Done*

Obs.: You can implement the back-end for this project if you want, but it is not required.
